JARRAH

A very durable and hard wearing species, Jarrah is a popular choice for exterior decking.

Jarrah ranges in colour from light to dark reddish brown and has a durable course texture.

Available in standard 90 x 19 profile.

We strongly recommend coating Jarrah as it reduces shrinkage & swelling.

HARDWOOD DECKING

Installation

For the correct installation of Timspec decking profiles, please refer to the Timspec hardwood Decking Installation Manual.
www.timspec.co.nz

Coating: Although not very common in New Zealand, coating your deck will extend its life. We recommend a minimum of one coat of a suitable exterior timber decking coating or oil be applied to all four sides plus cut ends of the decking prior to installation. Some species can be factory coated prior to delivery.

Maintenance

Cleaning: Annually cleaning your deck will help prolong its life, a light detergent that contains an anti-fungal agent is best. Avoid using high pressure waterblasters or harsh chemicals.

Recoating: Any coating or oil applied may require subsequent recoating. Refer to coating manufactures maintenance schedule.

Winter: Removing any items that will trap water underneath them (furniture, pot plants, etc.) for the duration of winter will extend the life of your deck and help keep it looking great.
